

Von Allen Abad, Software Developer

164 Block 9 Zone 2 Brgy. Fort Bonicafio • Taguig City, 1632 • vonallen.abad05@gmail.com • +639081747004

Profile

I'm a results-driven Software Developer specializing in JavaScript/TypeScript, with a strong focus on building responsive and user-friendly interfaces using React and React Native. I've delivered high-impact features, integrated REST APIs, and enhanced user experience through performance optimization in production environments. I actively leverage modern AI tools like GitHub Copilot, Cursor, and Microsoft Copilot to boost productivity and code quality. Passionate about crafting intuitive UI and continuous learning, I bring solid skills in frontend development, API integration, and SQL.

Education

Technological University of the Philippines

Bachelor of Science in Information Technology.

Relevant Coursework: Participated to be on Google Developer Student Club

Ermita, Manila

August 2023

Experience

Ascensoft Inc.

Muntinlupa, Alabang

Software Developer

Oct. 2023 – Present

- Design and develop mobile and web applications for Procter & Gamble using JavaScript/TypeScript, React, React Native, Node.js, REST APIs, and SQL.
- Implement new features, refactor and optimize existing code for maintainability and performance, and apply best practices in testing and deployment using Git and Azure.
- Introduced and integrated AI-assisted development tools (GitHub Copilot, Cursor, Microsoft Copilot) to streamline coding and review workflows.
- Built various apps for the company such as:
 - Logistics app, it is a field-and-office logistics companion for P&G-style operations, especially shipments and returns—with scanning, documents, signatures, offline use, and permissioned roles.
 - Daily money-tracking tool for a business that moves funds into different currencies and uses several banks. Works as a place staff record what happened with cash and bank money today.

Hacktiv Collab Inc.

Makati Ave

Web Developer Intern

March 2023 - July 2023

- Our first task with creating a straightforward login, signup, and landing page utilizing React, Tailwind CSS, Redux, Crypto JS, and JSON Server to handle dummy data. Begin each line with an action verb and include details that will help the reader understand your accomplishments, skills, knowledge, abilities, or achievements.
- The goal of this project was to build practical front-end web programming skills and learn how to combine different technologies to produce a useful online application.
- The second task was to develop a Property Management System where we must clone the system that was created by Raven Global, the sister company of Hacktiv Collab Inc. because it was developed using a different technology, so we must clone it using today's trending technology.
- The journey of our team as we worked on creating a cutting-edge Property Management System (PMS) utilizing contemporary technologies such as React.js, Tailwind CSS, Redux, Crypto.js, and other React libraries.

Skills

- **Technical:** JavaScript/TypeScript, React, React Native, HTML, CSS, Tailwind, Node.js, SQL, Git, Bruno, Copilot, Cursor, REST APIs, Scrum Development
- Debugging and resolving production issues
- Effective team collaboration and communication
- Adaptability and continuous learning
